

Bachelor in Systems Engineering

Migratory Status: Poland Blue Card (karta pobytu), USA B1/B2

E-mail: jerrysb7788@gmail.com

EXPERIENCE

EPAM SYSTEMS (Poland) 2021 – PRESENT
Software Engineer

Projects:

- Providing technical support to GCP client customers in Data branch.
- Implementation of an internal testing framework for the client internal dedicated system.
- Migration of internal monitoring reports using client internal monitoring framework.
- Developing backend system processors for data streaming for our monitoring dashboards.
- Migrating legacy services and its resources into newly dedicated environments.
- Participating in open source/collaboration projects managed by EPAM and assisting internal EPAM initiatives.
- Interim team lead. Providing status updates to management and clients, processing requirements and assisting team members facing stoppers or technical challenges.

Tech Stack: Python, Go, Bazel, GCP, Javascript, SQL, Lua, Scripting, Configuration, Terraform, IaC.

Tranzact (Peru) 2014 - 2021
Software Developer III

Projects:

- Migration of legacy data importer/exporter application to Airflow.
- Design and development of export workflow framework.
- Design and develop POCs for platform team.
- Internal customer data processing.
- Internal customer support and maintenance of daily basics operations.
- Legacy System Support.
- Applications Maintenance and Migration.

Tech Stack: Python, SQL, Hive, PostgreSQL, Azure, Airflow, ASPNET, SSIS, CI/CD, Teams, Jira, Go.

MIQ LOGISTICS (Peru) 2013
Analyst Developer

SUNAT (Peru) 2012
Professional Internship

SUMMARY

I am an experienced Bachelor in system engineering from Peru with over a decade of expertise in the software industry. My professional journey encompasses diverse aspects of software development, like engineering, data, operations, support, automation, and optimization.

I am proficient at swiftly adapting to new projects and have played key roles in various projects, demonstrating my ability to work independently when needed. I enjoy contributing to the company by joining open source initiatives and assisting other team areas issues. I excel at enhancing team performance by leveraging my technical expertise and leadership skills to guide projects and teams to success.

Staying in line of industry trends, my current focus is on Data, Machine Learning, LLMs, and Cloud Engineering.

SKILLS

Core

Python – Google Cloud Platform (GCP) – SQL – GO – GIT – Pandas – Notebooks – FastAPI – Ollama – CI/CD – Terraform – IaC

Former

PostgreSQL – Django – FastAPI – Hive – Kubernetes – NLP – Pub/Sub – Airflow – Hadoop – Spark – C# – Net. Framework – ASPNET – HTML – CSS2/CSS3 – PHP – Java – JavaScript – Docker – Typescript – SQL Server Integration Service – Azure – AWS – Oracle.

LANGUAGES

English (Advanced) – Spanish (Native)

EDUCATION

Universidad Privada del Norte (Trujillo, Perú)

- Bachelor of System Engineering (2011)
- Diplomat Audit and Information Security (2013)
- Diplomat Process and Continuous Improvement (2014)
- Diplomat Academic Research (2015)

Certifications

- [Professional Cloud Architect \(2023\)](#)
- [Professional Data Engineer \(2022\)](#)
- [Associate Cloud Engineer \(2021\)](#)
- [Microsoft Professional Program Data Science \(2020\)](#)
- [Python for Research \(2020\)](#)
- [WES Verified International Qualifications, Canada \(2020\)](#)
